

Enterprise Compliance Policy: Segregation of Duties (SoD) Policy ID: COMP-SOD-042 | Effective Date: March 15, 2024

1. Purpose: To prevent fraud, sabotage, and theft by ensuring that no single individual has control over all phases of a financial or critical technical transaction.

2. Financial Systems Conflicts:

- **Conflict F-1:** An employee may not hold both the `FIN_VENDOR_CREATE` (Ability to create new vendors) and `FIN_INVOICE_PAY` (Ability to issue payments) roles.
- **Conflict F-2:** An employee may not hold both the `PAYROLL_ADMIN` and `HR_COMPENSATION_EDIT` roles.
- **Resolution:** If a violation is detected during an audit or recertification, the `FIN_INVOICE_PAY` or `PAYROLL_ADMIN` role must be prioritized for immediate revocation.

3. Technical Systems Conflicts:

- **Conflict T-1 (Code to Prod):** An individual cannot possess both the `GIT_REPO_ADMIN` (Ability to approve code merges) and `CICD_DEPLOY_PROD` (Ability to trigger production deployments) roles.
- **Exemptions:** Only the "Release Management" team is exempt from Conflict T-1. All other departments must adhere to this rule.
